# Priyanshu – *Consultant Developer*

**Motivated** skilled full stack developer with **4.5 years** of experience (including internship) in **successful project delivery** majorly focused on front end development.

## PROJECT HISTORY - *Thoughtworks -* *July 2019 - Present*

### *METRO AG*

- Developed a platform for METRO AG employees which recommends price for grocery products based on their historical and competitor's data to improve sales and build customer relationship.
- Contributed to all aspects of the product including requirement analysis, creating user stories, building Frontend with React and React-redux, developing Backend features using Kotlin etc.
- Improved testing coverage from 65% to 90%+ for existing and new Backend and 70% to 100% for Frontend.
- Helped new team members on board to team
- Worked on removing vulnerabilities in repositories by updating node version and other libraries & Reduced build time of Backend repositories
- Actively participated in resolving customers' queries with positive attitude

### *BHASHADAAN*

- Developed a responsive web application to crowdsource different Indian languages for speech recognition AI techniques.
- Contribute in Vakyansh's recipes to build state of the art Speech Recognition Model
- Migrated HTML/JQuery Frontend using NextJs and Typescript
- Worked on existing Node JS Backend to add new features
- Developed Analytics dashboard which shows data collected by >1000 of people in 23 language from 29 states and 7 Union territories of India for multiple crowdsourcing initiatives using various types of Charts
